MBBS THIRD PROFESSIONAL EXAMINATION 2007 SPECIAL PATHOLOGY (MCQs)

Model Paper

Total No. of MCQs 65
Marks 65

Time 1 hour 5 minutes

01. A mother brought her infant to the pediatrician for delayed milestones, hepatosplenomegaly and pallor. Another sibling had similar problems for which repeated blood transfusions was advised. Confirmation of the diagnosis can be made by:
- Complete blood picture.
 - Iron studies.
 - Hemoglobin electrophoresis.
 - Bone marrow examination.
 - Liver biopsy.
- Key: C
- Topic: Hematology
02. Young female complains of episodic breath-lessness, cough, wheezing and chest tightness, worse during spring season. Pathological findings will include:
- Permanent enlargement of distal air spaces.
 - Mast cell activation.
 - Haemoptysis.
 - Excessive lysis of elastin.
 - α_1 - antiprotease deficiency.
- Key: B
- Topic: Respiratory System
03. During a routine pelvic examination, a 25 year old female was found to have an enlarged uterus. Ultrasound showed a multiloculated cystic structure in the uterine cavity. The mass was removed by dilatation curettage of the uterus and it showed placental like tissue. Which tumor marker is helpful in diagnosis and prognosis?
- CEA.
 - PSA.
 - S-100.
 - Beta-HCG.
 - CA-125.
- Key: D
- Topic: Female Genital Tract
04. In which of the following breast lesions is there a prominent giant cell reaction?
- Acute mastitis.
 - Fat necrosis.
 - Fibro adenoma.
 - Fibrocystic changes.
 - Sclerosing adenosis.
- Key: B

Best physiology mcq books. Which pathology book is best.

You can download the paper by clicking the button above. Mala Kamboj MDS FAGE Associate Professor, Department of Oral Pathology and Microbiology, Career Postgraduate Institute of Dental Sciences and Hospital, Lucknow, Uttar Pradesh, India by Sundeep S Bhagwath The mouth is an important organ with many different functions. Oral pathology refers to the diseases of the mouth, jaws, and related structures such as salivary glands, temporomandibular joints, facial muscles and perioral skin. The specialty oral pathology is concerned with diagnosis and study of the causes and effects of diseases affecting the oral and maxillofacial region. Multiple choice questions (MCQs) tests are the preferred format for accurate and comprehensive assessment of students' ability to think objectively and critically. Apart from postgraduate entrance examinations, they have also become an integral part of undergraduate examinations with most universities amalgamating them along with other longer forms of assessment. The reason they are favored is, due to the fact that, they are easy to evaluate and accurately assess the objective thinking of the candidates. This book consists of total 17 chapters and designed to cater to the needs of undergraduate dental students undergoing a study in the subject of oral and maxillofacial pathology. It includes all the pertinent areas covered under this subject and attempts to inculcate in the students an endeavor to explore the horizons of this subject. The questions have been framed keeping in mind particularly the undergraduate dental students as not many such resources are available to them. Explanatory answers of all the questions are also provided to aid the students in better understanding of the topics.
